

THERE'S MORE TO LOVE AT TINLEY PARK - PARK DISTRICT

REMEDIATE 280

March 2024

Progress continues to be made at the vacant site! Over the last several weeks, crews have been working to erect fencing around the perimeter of the property for security purposes.

Cleanup

Environmental Clean Up

In addition to the fencing work, crews recently were on site to remove three remaining underground storage tanks on the property. The tanks were removed in two isolated areas of the property, with oversight by the Illinois Office of the State Fire Marshall and the Illinois Environmental Protection Agency.

Soon, our efforts will focus on the next phases of clean-up work: removing asbestos and any other regulated materials in and around the vacant buildings and structures on site. After the removal work is completed, the buildings and structures will be demolished, and the material will be disposed of properly. We will endeavor to recycle and reuse the material we can, as allowed by regulations.

We will have more information to share on these phases of clean-up work soon. Please note that all work will be done with many precautions in place to ensure the safety of the surrounding

community.

The clean-up process is being led by our expert team of former Illinois EPA Director Renee Cipriano, leading environmental attorney Elizabeth Harvey, and Project Manager Michael Maloney, all under the oversight of the IEPA. Our experts are helping us ensure the safety of environmental work done at the site and make sure we receive the IEPA's stamp of approval to redevelop the site once clean-up work is done.

Our Remediate 280 Committee, led by Chair Lisa O'Donovan and Co-Chair Ashley Rubino, continues to meet every month with its diverse group of members and provide regular updates to our community. Head to our [website](#) for the committee's schedule.

Our New Website

We recently updated our [website](#), so please check it out for more information and updates on the property!
