Another Demolition

This week, crews began yet another demolition as work on Phase Two of cleanup nears completion. Cedar Hall is coming down as contractor Brandenburg

Industrial Service Co. counts down to the last buildings remaining to be razed on the 280-acre site.

We're thrilled at this latest progress being made on the long vacant property, which follows the old water tower coming down over the summer, teardown of the adjacent powerhouse, and ongoing work to clear over 5,600 linear feet of underground tunnels. Environmental and public safety monitoring continues at the site, with True North Consultants conducting dust monitoring to protect the health and safety of the surrounding community throughout the cleanup.

Phase Two Nears Completion

Brandenburg is working quickly to demolish the last remaining buildings on site, as we look to complete Phase Two of this extensive cleanup. Our experts are also working on a parallel track on the last phase of cleanup, which is the work we must do with the Illinois Environmental Protection Agency to prepare the property to be approved for redevelopment. As this phase moves along, we will conduct any additional environmental testing that is necessary for IEPA to give it the stamp of approval to move forward with redeveloping the site.

All phases of this project are being paid for entirely by state grant funding, ensuring that a safe and thorough cleanup is complete without asking our community to foot the bill!

Learn more about the cleanup through our community-driven Remediate 280 Committee that convenes monthly to discuss the state-funded cleanup in more detail. Find the schedule on our [website](#).
